PROJECTS

- **Portfolio-cum-Blog**   *May. 2022 - Present*
  Personal Project   git.io/JDmEc
  – Developed a portfolio-cum-blog using MDX leveraging the use of React components with the ease and simplicity of markdown.
  – The content can be dynamically added using NetlifyCMS which uses Github Repository as remote storage.
  – The data is parsed at build time using Next.js **getStaticProps** to create a static website eliminating the overhead of maintaining a separate database and server.
  – **Technologies Used:** *React.js, Next.js, Material-UI, Netlify CMS, MDX*

- **Real Estate Management System**   *April. 2021 - May. 2021*
  Personal Project   git.io/JWlPT
  – Developed a Real Estate Management System where users can buy and sell properties.
  – Implemented data visualisation features for the admins to observe the performance of agents.
  – The web app uses a mix of ***Static Site Generation(SSG)*** and ***Server Side Rendering(SSR)***.
  – **Technologies Used:** *React.js, Material-UI, **Next.js, MySQL***

- **IIITG Technical Board Portal**   *Jan. 2021 - April. 2021*
  IIITG Open Source Community   git.io/JWliY
  – Developed a ***Single Page Application(SPA)*** for the technical board and clubs under it, which uses client-side data fetching strategy using firebase firestore and firebase API.
  – Developed a dashboard to add / edit the content of the club pages using input forms and ***Drag and Drop*** Image Uploads.
  – **Technologies Used:** *React.js, Material-UI, React Bootstrap, Google Firebase*
